A comment on Postmaster General DeJoy's proposed 10 year plan

To the Postal Regulatory Commission:

It is extremely important that all American citizens and visitors have access to an affordable and reliable public postal service. People rely on the public postal service to deliver their medications, run their businesses, and vote.

I am concerned that Postmaster General DeJoy's 10-year plan will negatively impact this critical service. Specifically, I oppose the following:

Extension of delivery time to 5 days

Cessation of air transport of first class mail

Reducing the hours of and closing post offices

Outsourcing operations to private companies

I am in favor of repealing the requirement for the USPS to fully fund all employee retirement accounts in advance.

Thank you for your consideration.

Sincerely,

Henry Woolley
